

2021
Quinte Regional Science and Technology Fair
Expo-sciences régionale de Quinte

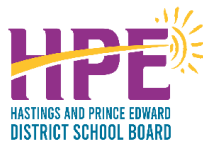

Join In! QRSTF is there to Help and Support Science Curriculum

This year the Quinte Regional Science and Technology fair will be providing support for the science curriculum in the Hastings and Prince Edward Counties. Since 1960 the QRSTF has been providing a platform for like-minded students to promote their scientific research. Thousands of students have benefited from this and we will continue to evolve and help students to succeed.

This year the QRSTF will be providing \$250 Gift Certificate to an educational science supply company if your school has five or more projects to the 2022 Quinte Regional Science and Technology Fair. This will increase the schools' ability to enhance the science curriculum. There are no prerequisites to join in. The school, teachers, parents or parent council just need to register their students with the QRSTF when the registration portal opens up in January. The creation of a science fair project provides opportunities for writing in various modes or forms. These nonfiction forms of writing can be integrated into all subject areas, and span the different skill areas within experimentation, research and/or technological problem-solving (i.e., initiate & plan, perform & record, analyze & interpret, communication). Scientific projects also give a student the opportunity to present his project enhancing their communication skills and vocabulary sought by business and industry.
